

The digital future of cash!

Monero for All

www.getmonero.org

Why Monero?

Private

Unlike Bitcoin, or any of the other top coins which make all transactions public, Monero transactions are inherently private and untraceable by default.

Secure

Through the use of advanced cryptographic techniques, the receipt of payments is secure and unalterable.

Accepted

Send payments to anyone locally or worldwide without expensive fees or waiting times.

Decentralized

Anyone can mine Monero using a computer to process transactions. This is why Monero is a community currency that is not controlled, manipulated or issued by a central authority.

Valued

Over the last 5 years (2018-2023), Monero has gained 218% vs the US dollar.

Separate Money and State

"We can't take money violently out of the hands of government, all we can do is by some sly roundabout way, introduce something that they can't stop."

- Friedrich A. Hayek

"...soon be developed, is a reliable e-cash, a method whereby on the internet you can transfer funds... the way in which I can take a \$20 bill and hand it over to you, with no record of where it came from."

- Milton Friedman

As easy as cash, only digital!
